

TILIA 11.5

Static rope specially invented for professional tree care operations.

DESCRIPTION

Rope has high static strength and low elongation which provides efficient work at the tree top.

Sheath construction guarantees higher abrasion resistance and longer lifetime.

Works perfectly with the friction knots as well with mechanical devices.

Ultrasonic ending.

With a splice at one end:
35, 45, 60 m

Spool:
100, 200 m

Selected lengths available with a splice at one end for optimal rope glide through devices like a cambium saver or pulley.

Small diameter ensures very good performance in terms of flexibility and weight.

KEY FEATURES

■ can be ended with a splice at one end

STANDARDS

CE 1019
EN 1891

FEATURES

UIAA

11.5 mm

30 kN

90 g/m

3 YEARS warranty

MATERIALS

● 54 % PES
● 46 % PA

TECHNICAL DATA

number of falls	= 20
strength	= 30 kN
min. strength with a knot	= 18 kN
percentage of sheath	= 54 %
sheath slippage	= 0.5 %
static elongation	= 3 %
shrinkage	= 1 %
